I have not had time to study all of the issues but I have lived in California my whole life and I have worked hard to preserve anything that is worth preserving because PEOPLE need nature and beauty in their lives.

Our marine life is a resource (not renewable once anything becomes extinct) worth protecting

I want my children and my children's children to be able to enjoy this precious resource.

I lived in Santa Barbara in the 70's and dealt with the oil seepage and tar that clung to our feet, fouled our carpets, stained our tubs . . . ICK!

Please, do all that you can to protect us from our own greed (gas/oil) and provide long term, visionary protection of our coast, sealife, etc.

Thank you,

Marcelle Bakula

Cambria, CA
